PROJECTS

PawPals github.com/thebobfather2/pawpals

- PawPals is an interactive website designed to allow users to search for their next adoptable pet. The project uses handlebars to produce each page, MySQL to store the animal cards, and features a login functionality for users to apply for adoption.
- Managed delegation of roles, creation of mockups, qualifications of MVP, development of HTML/CSS and Handlebars, organization of MVC, assistance of SQL database setup, and testing.
- Tools and languages used include HTML, CSS, JavaScript, Bootstrap, Agile Methodology, DOM, Node, Express, Heroku, MySQL and GitHub

Carrot Calendar github.com/thebobfather2/carrotcalendar

- Gaining over \$100k in revenue per year, Bobby's Rabbits needed a simple, efficient way to coordinate community events to boost interaction and sales. Carrot Calendar is a user-friendly calendar intended to handle online events, RSVPs and monetary transactions.
- Oversaw the development of APIs which allowed thousands of users from Asia, Africa and Europe to accurately engage with the events.
- Tools and languages used include HTML, CSS, JavaScript, Bootstrap, APIs, Agile Methodology, DOM, Node.js and GitHub.
